TRAVELLERS 

The Stages in a Workshop

Self-training Module

AT THE END OF THIS MODULE...

...I will be able to...

- Design workshops in a structured way
- Structure workshops in a way that allows participants to grow in autonomy
- Adapt the structure of my workshops according to the needs of my public and to make my workshops more dynamic

**A basic
template**
*For an
educational
sequence*

4 stages of a complete educational sequence

The awakening stage

AWAKENING

PURPOSE

- Let preconceptions emerge
- Understand potential obstacles
- Create links between pre-existing knowledge and skills and new ones

Example activity: Participants write worries and hopes on post-it notes and share them.

What other activities could I organise for the awakening stage of a workshop?

PURPOSE

- Introduce new content
- Learner discovers new knowledge or skill
- Explain, support understanding

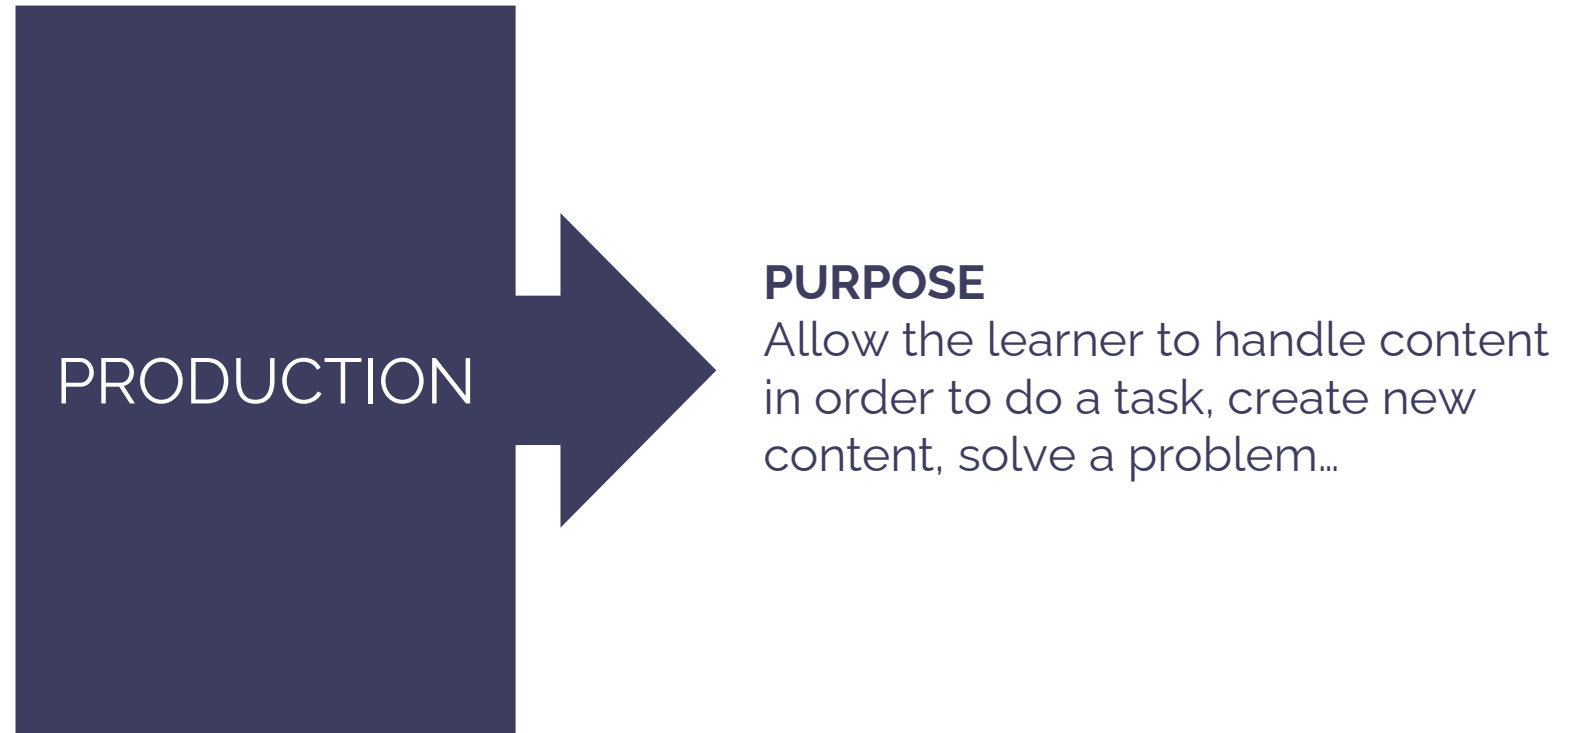

Example activity: Presentation by the facilitator of a job search website and how to use it.

What other activities could I organise for the supply stage of a workshop?

The production stage

Example activity: Participants carry out a job search on the same website shown by the facilitator before.

What other activities could I organise for the production stage of a workshop?

PURPOSE

Allow the learner to gain in autonomy by getting them to do a similar, but not identical task.

Example activity: Participants do a job search on a website of their choice which is relevant for them.

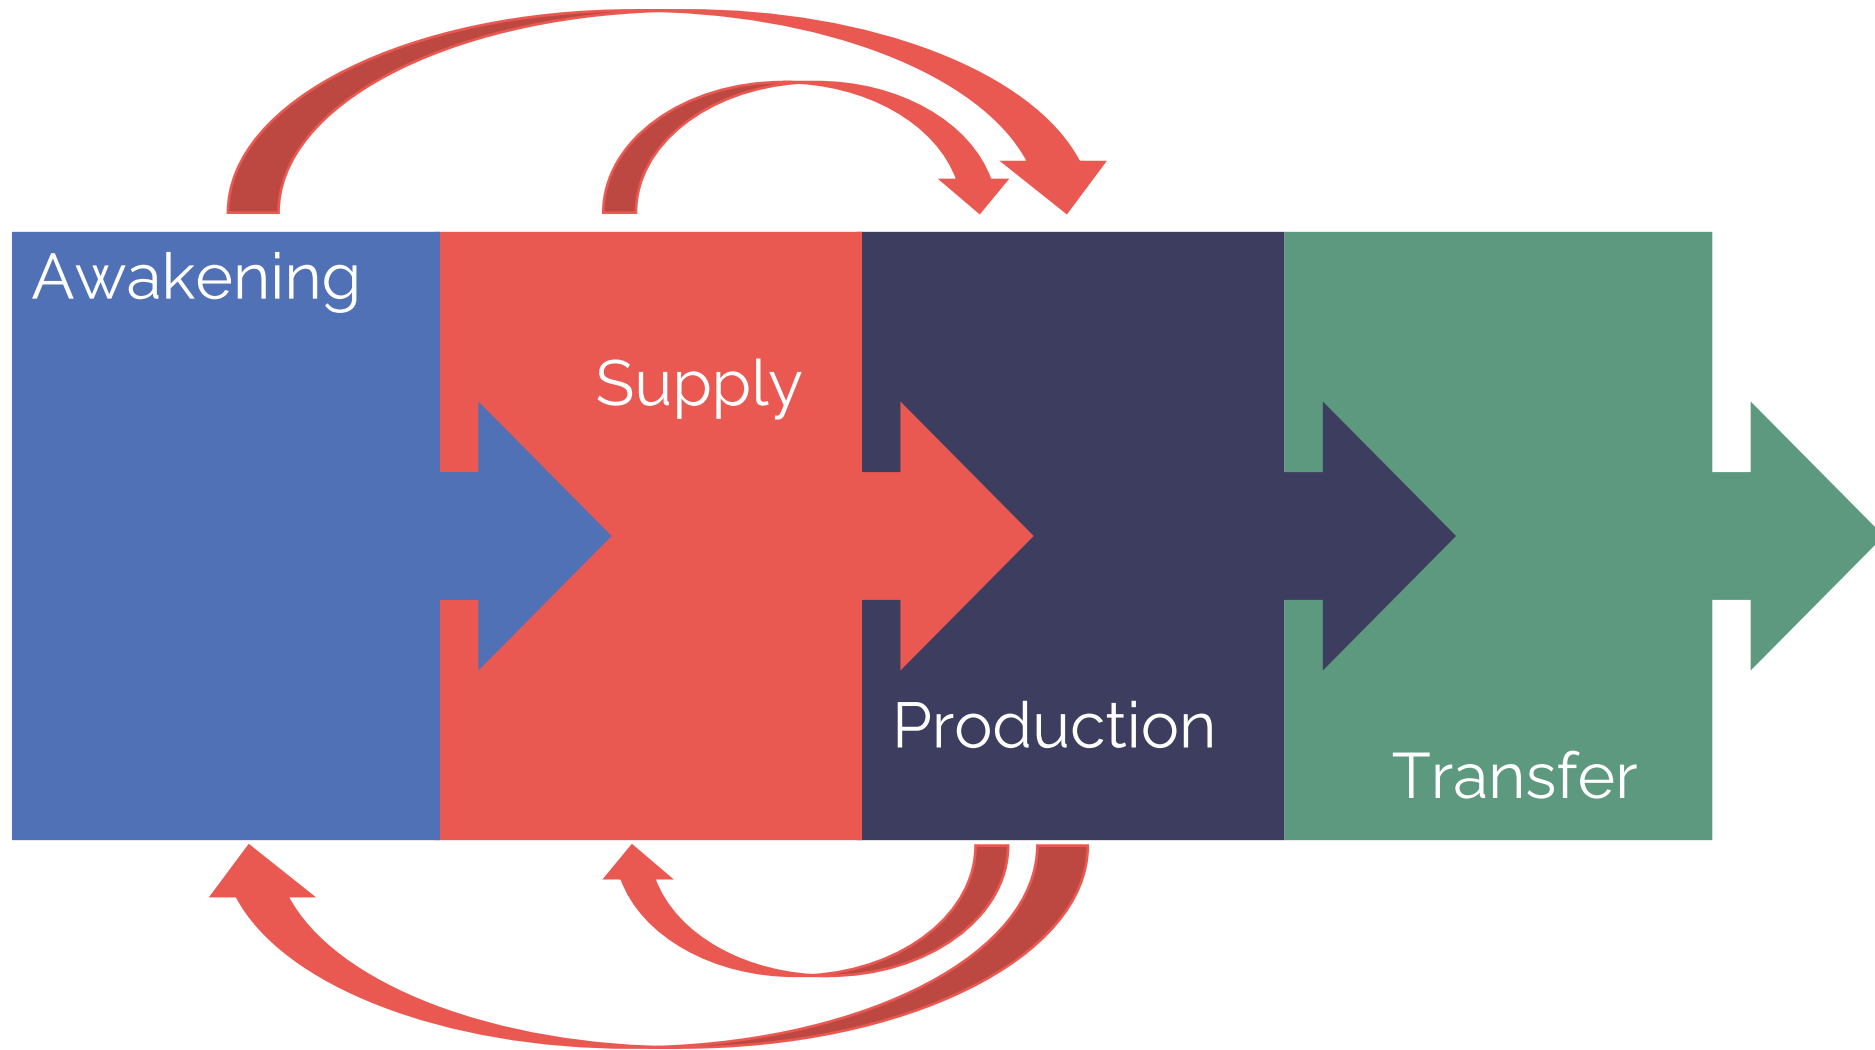

What other activities could I organise for the transfer stage of a workshop?

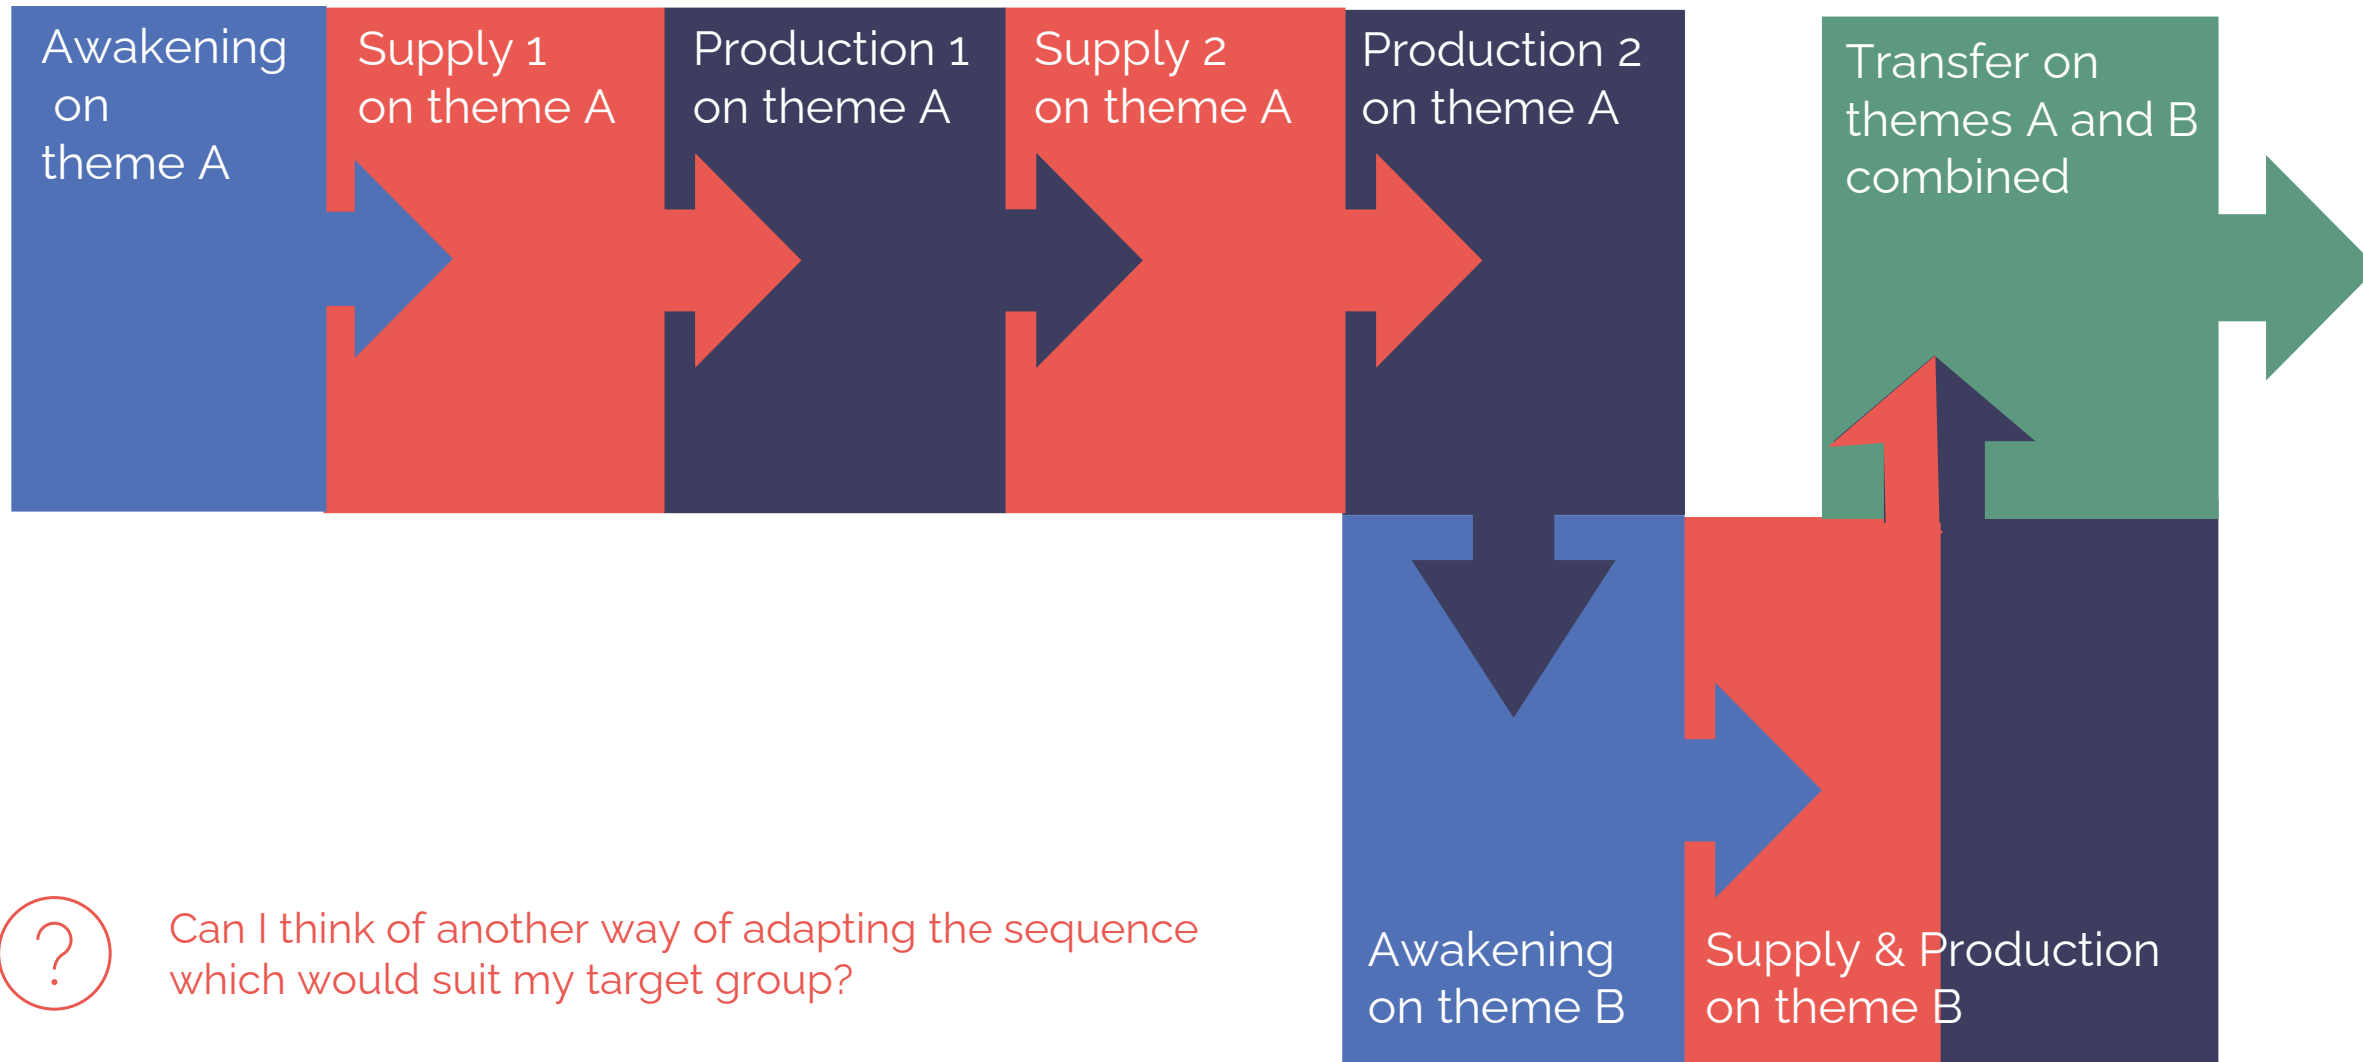

Combine...
***...stages and
cycles***

Stages feed into each other

Adapting the sequence to make it more dynamic

Can I think of another way of adapting the sequence which would suit my target group?

IN SHORT

What practical use is this educational sequence for me?

- Thinking in stages allows me to design my workshop in a structured way
The basic sequence offers a simple template to organise practical activities in a (chrono)logical way.
- It also helps me to fulfil my role as facilitator
My role as a facilitator is to help and support participants, in a gradual and dynamic way, build up their own knowledge, skills and autonomy, taking into account their preconceptions.
- Sequencing in stages with different types of activities allows me to create more varied, more motivating and more dynamic workshops
*Combining and interweaving stages with different purposes avoids dullness.
Production and transfer stages bring meaning to learning.*

NEXT STEPS

In your training journey...

1. Consult other modules

- My Role as a Facilitator
- Working with Vulnerable Groups
- Creating a Positive Learning Environment

2. Browse practical guidance related to this module

- Guide: Planning a Workshop
